

JT-RD6006-CASE01

Small Case for JT-RD6006

This enclosure is designed for the laboratory power supply JT-RD6006 and has two sockets for DC power supply, a power switch and an active cooling system on the rear panel. As a compact housing, it is recommended for setups with limited space and an existing DC power supply.

If you also need a DC voltage source, we recommend the JT-RD6006-CASE02, which accommodates the JT-RD6006 laboratory power supply and the 400 W industrial power supply JT-RD6006-NT.
