

HORTUS Patio heater UFO hanging model 2000 W

Suspended, infrared patio heater with a smart and futuristic design - perfect to mount above the table in the covered patio or the conservatory. 80% of the energy in this UFO model is converted into heat and provides plenty of heat to everyone seated around the table. The patio heater has 2000 W clear, infrared halogen tubes with a lifespan of minimum 5000 hours. It also has LED lights that can be controlled from the remote control, which is included. Comes with a soft touch power button. A cover can be purchased as an extra accessory.
